DEMI ADEWOLE

demiadewole0@gmail.com | +447777513443 | London | github.com/d-adz

PROFILE

Software Engineering and AI graduate (2:1) transitioning into cybersecurity with hands-on experience in secure systems development, digital forensics, and threat analysis. Strong technical foundation in Python, Linux, databases, and cloud computing. Currently building practical security skills through TryHackMe (Defensive Security path), preparing for CompTIA Security+, and training for AWS Cloud Practitioner certification. Proven ability to analyze systems, identify vulnerabilities, and implement secure solutions. Seeking graduate roles in SOC analysis, digital forensics, or security engineering.

EDUCATION

University of Leicester | Sep 2022 – Sep 2025
BSc Software Engineering and Artificial Intelligence – 2:1 (Upper Second Class Honours, 3% from First)
Final-Year Project: Referee Analysis Web Application – First Class grade

Security-Relevant Modules: Cybersecurity, Internet and Cloud Computing, Operating Systems, Databases, Software Architecture, Algorithms, Requirements Engineering, C++ Programming

Cybersecurity Training & Certifications:

- TryHackMe – Defensive Security Learning Path (In Progress) – SOC Level 1 training
- CompTIA Security+ (Preparing for exam)
- IBM Cybersecurity Fundamentals (Completed, Feb 2026)
- Cisco Introduction to Cybersecurity (Completed)
- AWS Cloud Practitioner (In Progress)

St Lawrence College | 2016–2022
A Levels: Maths, Biology, Physics, Finance (AS) | GCSEs: Grade A* average including Maths, English, Computer Science

TECHNICAL SKILLS

Security Skills: Threat analysis (TryHackMe labs), network security fundamentals, secure coding practices, vulnerability assessment, digital forensics concepts, Linux command line, penetration

testing basics

Programming & Scripting: Python (automation, scripting), SQL (database queries, security audits), Java, HTML/CSS, C++ (in progress)

Tools & Platforms: Git/GitHub, Flask, MySQL, Linux (Ubuntu/Kali), AWS (training), TryHackMe, Wireshark (basics)

Core Competencies: System analysis, log analysis, incident response procedures, secure application development, cloud security, database security

TECHNICAL PROJECTS

Referee Analysis Web Application – Final Year Project (First Class)

- Built secure full-stack application with user authentication, session management, and input validation
- Implemented database security measures including parameterized queries to prevent SQL injection
- Designed with security-first approach: encrypted passwords, secure API integration, data sanitization
- Tech stack: Flask, MySQL, Bootstrap, third-party APIs

Cloud Infrastructure & Security Project (GitHub: d-adz)

- Developed cloud architecture using Infrastructure as Code (IaC) templates and Shell scripting
- Implemented network configuration, user data automation, and security group configurations
- Gained hands-on experience with cloud security principles and automated deployment

TryHackMe Security Labs (Ongoing)

- Completing Defensive Security path focused on SOC analysis, threat detection, and incident response
- Hands-on practice with log analysis, SIEM tools, network traffic analysis, and malware investigation

EMPLOYMENT & EXPERIENCE

Delivery Driver | Iceland Foods | Apr 2024 – Present

- Demonstrate reliability, time management, and attention to detail under pressure
- Manage route optimization and problem-solving in dynamic environments

Freelance Photographer | Self-Employed/PHOTODIG | Dec 2023 – Present

- Built custom booking and payment systems combining technical skills with business requirements
- Manage full project lifecycle from client consultation to delivery (photodig.org)

Coding Tutor | Self-Employed | Jul 2019 – Jul 2022

- Delivered online programming lessons, explaining complex technical concepts clearly
- Developed structured learning plans and adapted teaching methods to different skill levels

Administrative Clerk | St Albans Surgery | Mar 2021 – Aug 2021

- Managed healthcare budget tracking and file digitization during COVID-19 backlog
- Demonstrated attention to detail and data accuracy in sensitive environment

ADDITIONAL INFORMATION

- Leadership: Former Head of House at St Lawrence College
- Problem-solving: Competed in university hackathons, applying team-based solutions under time pressure
- Continuous Learning: Actively building security skills through self-directed study and practical labs
