DEMI ADEWOLE

demiadewole0@gmail.com | +447777513443 | London | github.com/d-adz | photodig.org

PROFILE

Software Engineering and AI graduate (2:1) with practical experience building secure, scalable full-stack applications. Proficient in Python, Java, SQL, and modern web frameworks with strong foundations in databases, algorithms, and cloud computing. Demonstrated ability to deliver high-quality software through final-year project achieving First Class grade. Comfortable working across the full development lifecycle from requirements gathering to deployment. Seeking graduate software engineering roles where I can apply technical skills, learn from senior engineers, and contribute to building robust systems.

EDUCATION

University of Leicester | Sep 2022 – Sep 2025
BSc Software Engineering and Artificial Intelligence – 2:1 (Upper Second Class Honours, 3% from First)
Final-Year Project: Referee Analysis Web Application – First Class grade

Key Modules: Software Architecture, Algorithms, Databases, Operating Systems, Requirements Engineering, User Interface Design, Internet and Cloud Computing, C++ Programming, AI for Space Applications

St Lawrence College | 2016–2022
A Levels: Maths, Biology, Physics, Finance (AS) | GCSEs: Grade A* average including Maths, English, Computer Science

TECHNICAL SKILLS

Programming Languages: Python (primary), Java, SQL, HTML/CSS, JavaScript, C++ (in progress)

Frameworks & Tools: Flask, Bootstrap, MySQL, Git/GitHub, RESTful APIs, Arduino

Development Skills: Full-stack web development, database design and optimization, API integration, responsive UI/UX design, version control, secure coding practices

Cloud & Infrastructure: AWS (Cloud Practitioner in progress), Infrastructure as Code, Linux/Unix systems

Methodologies: Agile development, requirements analysis, testing and debugging, code review, documentation

TECHNICAL PROJECTS

Referee Analysis Web Application – Final Year Project (First Class)

- Designed and built full-stack football referee performance tracking platform from requirements to deployment
- Implemented user authentication system, incident tracking, real-time analytics dashboard, and data visualization
- Integrated third-party APIs for match data, designed MySQL database schema, created responsive frontend with Bootstrap
- Achieved First Class grade through clean code architecture, comprehensive testing, and secure implementation
- Tech stack: Python (Flask), MySQL, Bootstrap, JavaScript, RESTful APIs

Cloud Infrastructure Project (GitHub: d-adz)

- Developed cloud architecture using Infrastructure as Code (IaC) templates and Shell scripting
- Automated deployment and configuration of cloud resources
- Implemented network security configurations and user data automation scripts

Arduino Robot Design

- Designed and programmed functional robot using C++ and Arduino platform
- Strengthened embedded systems programming and hardware integration skills

Photography Business Platform (photodig.org)

- Built custom booking and payment system for freelance photography business
- Managed full development lifecycle from business requirements to production deployment

EMPLOYMENT & EXPERIENCE

Freelance Photographer | Self-Employed/PHOTODIG | Dec 2023 – Present

- Manage full project lifecycle: client requirements gathering, execution, delivery, and feedback iteration
- Built and maintain business website with custom booking system (photodig.org)
- Developed strong client communication skills and ability to translate requirements into deliverables

Coding Tutor | Self-Employed | Jul 2019 – Jul 2022

- Delivered tailored online programming lessons via Zoom to students of varying skill levels
- Created structured learning plans and explained complex technical concepts clearly
- Demonstrated ability to break down problems and adapt communication style to audience

Delivery Driver | Iceland Foods, Amazon | 2023 – Present

- Demonstrated reliability, time management, and problem-solving in fast-paced environment

Sales Assistant | JD Sports | Jun 2022 – Jul 2023

- Developed customer service and team collaboration skills in retail environment

Administrative Clerk | St Albans Surgery | Mar 2021 – Aug 2021

- Managed healthcare budget tracking and digital file organization during COVID-19 backlog
- Demonstrated attention to detail and data accuracy in sensitive medical environment

ADDITIONAL INFORMATION

- Certifications: AWS Cloud Practitioner (in progress), IBM Cybersecurity Fundamentals, Cisco Introduction to Cybersecurity
- Leadership: Former Head of House at St Lawrence College
- Hackathons: Competed in university coding competitions, applying team-based problem-solving under time constraints
- Creative: Grade 7 Piano, Grade 5 Guitar – demonstrates discipline and commitment to mastering complex skills
